Summary

Experienced network engineer with a passion for creating robust and efficient networking solutions. I am thrilled to bring my expertise in switching and routing to contribute to the success of dynamic organizations. Throughout my career, I have successfully designed, implemented, Migration and maintained complex network infrastructures, ensuring optimal performance and seamless connectivity. experience in implementing and managing complex network infrastructures, including Data Center, Software Defined Networking (SDN). My strong understanding of switching and routing protocols, enables me to troubleshoot and resolve network issues efficiently, minimizing downtime and maximizing productivity.

Work Experience

• PT Mitra Solusi Infokom (MSInfokom)

September 2023 – Present

Network Engineer

1. Implementing network infrastructure project L2 – L3, configuration and documentation.
2. Carry out Daily Planning, Implementation, and Operations for the Data Center, network configuration & network architecture (including hardware and software technology, site location, and technology integration) and systems.
3. Monitor the performance of the Data Center systems, Campus Network and perform security measurements, troubleshooting, and maintenance as needed.
4. Designing and managing a Software-Defined Network & Campus Network.

• PT Angkasa Pura Solusi Integra

July 2022 – September 2023

Lead Network Engineer

1. Led network operations teams and acted as technical authority for enterprise and data center network environments.
2. Managed core switching and routing infrastructure using MikroTik CCR1036/CCR1072 and Aruba devices.
3. Designed and managed ISP and Internet Exchange connectivity (Cyber APJII, IX, IIX) with multi-NAP BGP peering.
4. Implemented Static Routing, OSPF between sites, and BGP for external connectivity and redundancy.
5. Designed and deployed Fortinet firewall solutions to secure enterprise network traffic.
6. Implemented IP backbone monitoring using Zabbix, Cacti, and Observium, enabling proactive fault detection and faster incident resolution.
7. Led incident management, Root Cause Analysis (RCA), and service recovery to meet SLA targets (>99%).
8. Reviewed and approved Method of Procedure (MOP) for production network changes.
9. Developed backup and contingency plans for ISPs, switches, routers, fiber optic, and Metro-E services.
10. Managed VMware ESXi host configuration and supported virtualization environments.

• Internship of PT. PLN (Persero) Unit Induk Wilayah Sulselrabar

August 2020 – November 2020

Database Administrator

1. Work closely with IT managers to manage application databases on a weekly basis.
2. Maintains two employee performance appraisal applications and regularly reports the results of application updates every week.

Education

Institut Teknologi PLN	Jakarta, Indonesia
Bachelor: Informatics Engineering	August 2021
GPA 3.30/4.00	

License dan Certification

• Aruba Certified Professional – Switching	Juni 2025
HPE Aruba Networking	
• Aruba Product Specialist - CX 10000 Switch	Juni 2024
HPE Aruba Networking	
• Aruba Product Specialist - Central	Juni 2024
HPE Aruba Networking	
• Aruba Accredited SD - WAN Expert	August 2024
HPE Aruba Networking	
• Fortinet Network Security Expert Level 3: Certified Associate	December 2022
Fortinet	
• RUCKUS ICX Implementer Accreditation (RICXI)	March 2023
CommScope	
• EnGenius Certified Network Professional	March 2023
EnGenius Technologies	
• EnGenius Certified Network Specialist	March 2023
EnGenius Technologies	
• CCNA Network Engineer	September 2022
Cisco	
• NVIDIA Ethernet Products	March 2023
Nvidia	
• License Microsoft Office Specialist	February 2021
Certiport A Pearson VIJE Business	
• Certificate English Proficiency Test (EPrT)	July 2021
Universitas Telkom	
• License Microsoft Technology Associate	August 2021
Certiport - A Pearson VI-JE Business	
• License Technical Support Basics	February 2022
Coursera Google	
• Ins and Outs of Computer Networks	May 2021
Coursera Google	

Skill

L2/L3 Network Architecture	VXLAN	Metro Ethernet
Data Center & Campus Network	MikroTik	Internet Service Provider (ISP)
Core & Backbone Network Design	BGP	Network Troubleshoot
High Availability & Redundancy Design	Cisco Switch	HPE Aruba Switch

Portfolio

1. Kompas Gramedia - Installation Aruba Data Center & Campus Core - Access
 - deployed Spine–Leaf (CX10000) and Border-Leaf architectures to improve east–west traffic performance and scalability.
 - Implemented Aruba Fabric Composer (AFC), reducing fabric provisioning and configuration time by 40–50%.
 - Deployed Pensando CX10000 for distributed security and services within the data center fabric
2. GMF aeroasia - Soekarno Hatta International Airport
 - Led the operation and optimization of L2/L3 enterprise networks.
 - Implemented, and maintained VSX Core Switch architecture for high availability.
 - Engineered and optimized OSPF routing to ensure resilient and scalable internal connectivity.
 - Provided senior-level troubleshooting and network performance optimization.
3. G-town Square Serpong
 - Designed and led the implementation of network infrastructure and backbone systems.
 - Managed fiber optic backbone deployment for high-speed and redundant connectivity.
 - Implemented router gateways, switching infrastructure, and enterprise-grade Ruckus wireless access points.
 - Oversaw end-to-end network rollout, configuration, and post-implementation support.
4. Kualanamu International Airport
 - Architected and developed enterprise network infrastructure and backbone topology.
 - Designed and implemented BGP connectivity with ISPs for reliable external routing.
 - Led the design and deployment of new network topology aligned with airport operational requirements.
 - Implemented IP backbone monitoring using Cacti NMS for proactive performance and fault management.
5. PT Angkasa Pura Solusi Soekarno-Hatta International Airport
 - Led the implementation and management of office network infrastructure and backbone systems.
 - Designed and configured Fortinet security appliances to enhance network security posture.
 - Oversaw deployment and configuration of routers, switches, and Aruba wireless access points.
 - Managed enterprise internet connectivity and ensured SLA compliance
6. AirAsia Airline Soekarno-Hatta International Airport
 - Led the development of enterprise network infrastructure supporting airline operations.
 - Configured and managed Alcatel switching environments.
 - Deployed IT infrastructure and managed end-user network devices with enterprise standards.
7. PT Angkasa Pura Solusi Integra Soekarno-Hatta International Airport
 - Led office network infrastructure and backbone implementation projects.
 - Configured Alcatel switches and managed enterprise end-user network devices.
 - Provided senior-level network support and operational oversight.
8. Sapphire - Plaza Premium Lounge Soekarno-Hatta International Airport Terminal 1 and 3
 - Led network implementation for premium passenger service environments.
 - Designed and deployed IPTV and VoIP solutions for lounge operations.
 - Configured and managed Alcatel switches.
 - Ensured high availability and performance of lounge network services
