Summary

Experienced network engineer with a passion for creating robust and efficient networking solutions. I am thrilled to bring my expertise in switching and routing to contribute to the success of dynamic organizations. Throughout my career, I have successfully designed, implemented, Migration and maintained complex network infrastructures, ensuring optimal performance and seamless connectivity. experience in implementing and managing complex network infrastructures, including Data Center, Software Defined Networking (SDN). My strong understanding of switching and routing protocols, enables me to troubleshoot and resolve network issues efficiently, minimizing downtime and maximizing productivity.

Work Experience

• PT Mitra Solusi Infokom (MSInfokom)

September 2023 – Present

Network Engineer

- 1.Implementation of the L3 network infrastructure project, including configuration and documentation at the project data center.
- 2.Build simulations in test labs to resolve sophisticated problems and validate designs/solutions.
- 3.Carry out Daily Planning, Implementation, and Operations for the Data Center, network configuration & network architecture (including hardware and software technology, site location, and technology integration) and systems.
- 4.Network planning, Integration and network maintenance
- 5.Ensure that assigned infrastructure at the client site is configured, installed, tested and operational
- 6.Monitor the performance of the Data Center systems, Campus Network and perform security measurements, troubleshooting, and maintenance as needed
- 7.Designing and implementing data centers using EVPN-VXLAN, Aruba Fabric Composer, and campus networks.
- 8.Identify problems and errors prior to or when they occur and log all such incidents in a timely manner with the required level of detail.

• PT Angkasa Pura Solusi Integra

July 2022 – September 2023

Lead Network Engineer

Executing the operation, maintenance, and implementation of network infrastructure at PT Angkasa Pura II—encompassing Public Networks (Wired and Wireless), Traditional Data Centers, Last-mile, and Metro-E and including the allocation and management of two /24 Public IP blocks

Key Roles and Responsibilities

- 1.Led network operations teams and acted as technical authority for enterprise and data center network environments.
- 2.Build simulations in test labs to resolve sophisticated problems and validate designs/solutions.
- 3.Managed core switching and routing infrastructure using MikroTik CCR1036/CCR1072 and Aruba devices.
- 4.Designed and managed ISP and Internet Exchange connectivity (Cyber APJII, IX, IIX) with multi-NAP BGP peering.
- 5.Implemented Static Routing, OSPF between sites, and BGP for external connectivity and redundancy.
- 6.Ensure that assigned infrastructure at the client site is configured, installed, tested and operational.
- 7.Implemented IP backbone monitoring using Zabbix, Cacti, and Observium, enabling proactive fault detection and faster incident resolution.

- 8. Identify problems and errors prior to or when they occur and log all such incidents in a timely manner with the required level of detail.
- 9. Reviewed and approved Method of Procedure (MOP) for production network changes.
- 10. Developed backup and contingency plans for ISPs, switches, routers, fiber optic, and Metro-E services.
- 11. Managed VMware ESXi host configuration and supported virtualization environments.
- 12. Investigate second line support calls assigned and identify the root cause of incidents and problems.
- 13. Network planning, Integration and network maintenance
- 14. Successfully led and executed the end-to-end network integration for the critical infrastructure at Soekarno-Hatta International Airport, including the Biometric Autogate system, Self-Check-In Kiosks, Public Wi-Fi, and tenant commercial networks.

• **Internship of PT. PLN (Persero) Unit Induk Wilayah Sulselrabar**

August 2020 – November 2020

Database Administrator

- 1. Work closely with IT managers to manage application databases on a weekly basis.
- 2. Maintains two employee performance appraisal applications and regularly reports the results of application updates every week.

Education

Institut Teknologi PLN <i>Bachelor: Informatics Engineering</i> GPA 3.30/4.00	Jakarta, Indonesia August 2021

Skill

VXLAN	L2VNI & L3VNI	Spine-Leaf Architecture
Underlay & overlay	MikroTik	Internet Service Provider (ISP)
Aruba Fabric Composer	BGP	Network Troubleshoot
VTEP Design	Policy Based Routing	BGP EVPN

Portfolio

1. Data Center Network Installation - Kompas Gramedia

- Deployed Spine-Leaf (CX10000) and Border-Leaf architectures to optimize east-west traffic performance and network scalability.
 - Implemented Aruba Fabric Composer (AFC), successfully reducing fabric provisioning and configuration time by 40–50%.
 - Integrated Pensando CX10000 to deliver robust distributed security and services within the data center fabric.

Product:

 - Aruba CX10000 Series (Leaf)
 - Aruba CX8000 Series (Spine/Border Leaf)
 - Aruba Fabric Composer (AFC)

Technologies:

VSX, EVPN, iBGP, eBGP, L2/L3 VNI, VRF, VXLAN, OSPF, Policy-based routing (PBR)

2. Enterprise Network Optimization - GMF AeroAsia (Soekarno-Hatta International Airport)

- Led the operation, maintenance, and optimization of L2/L3 enterprise networks.
 - Implemented and maintained VSX Core Switch architecture to ensure continuous high availability (HA).
 - Engineered and optimized OSPF routing protocols for resilient and scalable internal connectivity.
 - Provided senior-level network troubleshooting and proactive performance tuning.

Product:

 - Aruba VSX Core Switch
 - Aruba CX8000 Series

Technologies:

VSX, OSPF, LACP, Enterprise L2/L3 Routing & Switching

3. Network Infrastructure Implementation - Mayapada Hospital (MHJS, MHKN, MHTG)

- Led the end-to-end implementation of network infrastructure across multiple hospital branches.
 - Deployed enterprise-grade routing, switching, and wireless solutions to support critical healthcare operations and data transmission.
 - Ensured secure and reliable network connectivity tailored to hospital environments and compliance standards.

Product:

- Aruba Instant-ON

Technologies:

Enterprise WLAN, VLAN, LACP.

4. Network Infrastructure & Backbone Deployment - G-town Square Serpong.

- Directed the end-to-end rollout, configuration, and post-implementation support of network infrastructure and backbone systems.
- Managed fiber optic backbone deployments to guarantee high-speed and redundant connectivity.
- Deployed router gateways, switching infrastructure, and enterprise-grade Ruckus wireless access points.

Product:

- Ruckus Wireless Access Points
- MikroTik CCR1072
- Alcatel-Lucent Switches 6860

Technologies:

Fiber Optic Backbone, Enterprise WLAN, L2/L3 Routing & Switching, LACP, BGP, IPsec, L2TP

5. Enterprise Network & Backbone Architecture - Kualanamu International Airport

- Architected enterprise network infrastructure and backbone topologies tailored to airport operational requirements.
- Designed and established reliable EBGP connectivity with multiple ISPs for external routing.
- Implemented IP backbone monitoring using Cacti NMS to enable proactive fault management and performance tracking.

Product:

- MikroTik CCR1072
- Cacti NMS Server
- Switch Alcatel Lucent

Technologies:

EBGP, IP Backbone Monitoring, NMS (Network Management System), Enterprise Routing.

6. Office Network Infrastructure - PT Angkasa Pura Solusi Integra (Soekarno-Hatta International Airport)

- Spearheaded office network infrastructure and backbone implementation projects.
- Configured and managed Alcatel switching environments and enterprise end-user network devices.
- Delivered senior-level network support and comprehensive operational oversight.

Product:

- Alcatel Switches
- MikroTik RB1100

Technologies:

- L2/L3 Routing & Switching, Enterprise Network Support, Backbone Implementation.

7. Network & IPTV Solutions - Sapphire Plaza Premium Lounge (Soekarno-Hatta Terminal 1 & 3)

- Designed and deployed robust network solutions, including IPTV and VoIP systems, for premium passenger service environments.
- Configured and managed Alcatel switches to ensure the high availability of critical lounge network services.
- Ensured optimal network performance and seamless connectivity for VIP lounge guests.

Product:

- Alcatel Switches
- IPTV & VoIP End-Devices
- MikroTik CCR1036

Technologies:

Network High Availability, L2/L3 Switching & Routing.

8. Office Network & Security Deployment - PT Angkasa Pura Solusi (Soekarno-Hatta International Airport)

- Managed the implementation of office network infrastructure and backbone systems.
- Designed and configured Fortinet security appliances to strengthen the enterprise network security posture.
- Oversaw the deployment of routers, switches, and Aruba wireless access points, ensuring strict SLA compliance.

Product:

- Fortinet Security Appliances (FortiGate)
- Aruba Wireless Access Points
- Aruba 2900 Series

Technologies:

Network Security, Firewall Configuration, Enterprise WLAN, L2/L3 Switching.

9. Enterprise Network Infrastructure - AirAsia (Soekarno-Hatta International Airport)

- Developed and supported enterprise network infrastructure crucial for daily airline operations.
- Configured and maintained robust Alcatel switching environments.
- Deployed IT infrastructure and managed end-user network devices in alignment with strict enterprise standards.

Product:

- Alcatel Switches

Technologies:

Enterprise Networking, L2/L3 Switching, IT Infrastructure Deployment, Last Mile, Spanning Tree Protocol (STP), Loop Protection

10. Network & Aruba Access Point Implementation - Airport Learning Center (Soekarno-Hatta)

- Executed the deployment and configuration of Aruba wireless access points and underlying network infrastructure.
- Optimized WLAN configuration to ensure seamless wireless coverage and network stability for training and learning environments.

Product:

- Aruba Wireless Access Points
- Aruba 2900 Series

Technologies:

- WLAN Configuration, Wireless Networking, L2 Switching, LACP
